KM ~ Cold shrink sleeves

Technical specifications

WIDTH	LENGTH	PIECES	KG
75	15	24	1,35
50	15	24	0,82

Is used for sealing ducts, especially for places which require airtight sealing

Technical details:

• carrier: 0,1mm polyethylene

• adhesive coating: 1mm

colour: grey

banding time: 24 hours (max.)

• water resistance: very good, apply to dry surface

peel on steel: 9 N/cm (23°C)

• density: 1.7g/cm³

elongation at break: ≥ 700%

• fire reaction classification: B2 (DIN 4102, part 1)

flexibility: excellent up to -40°C

• temperature resistance: -40°C to +70°C • solid substance: 100%, no evaporation

• ageing process: very slow

• storage: as dry as possible
